

White list: IT DEPARTMENT NOTICE

There might be an instance where a staff member may come across a video or page on our site and they aren't allowed to view it because of a firewall in your district's network. This will also happen whenever your staff is expecting an email from us and your firewall blocks any of our email domains and marks us as spam.

In order to prevent this from happening, please send the following note to your IT Department:

We are working with McKinney-Vento.org who we have contracted for compliance training on McKinney-Vento Homeless Education laws. In order to successfully take the training, users must register on the McKinney-Vento.org website and also view the video trainings on the McKinney-Vento website.

There will also be some moments when a staff member may need to receive an important email from McKinney-Vento.org during the registration and training process. For example, when any staff members register, users are sent an email from their site that allows them to complete their registration by creating a password. They may also receive emails when they contact the support team. In order to prevent these important emails from being blocked, please make sure that the following email domains are whitelisted so that their emails can reach everyone in our district/school:

@mckinney-vento.org

@mg.mckinney-vento.org

@bf02x.hubspotemail.net

In addition to this, please whitelist the following links so staff can access their training:

Please note: The videos in the links below will only be viewable on the McKinney-Vento site (they are embedded) - The videos will not be accessible when clicking the links above
